- Policies To Maintain Efficiency, Security And Performance
- Access Control , Surveillance
- Structured Cabling , Cable Management

DIGITAL TRANSFORMATION CONSULTING

A digital transformation consultant or consulting company's role is to help an organization identify ways to become more profitable by implementing strategic changes with the help of technology.

How do we do this?

- Assess the customer's current position & needs: What aspects of the business can gain from technology? How can we help the customer to secure a sustainable future?
- Develop client strategies around digital solutions: Where and which technologies could be used to enter a new market or to outperform the competition?
- Assist in the development of business cases for new digital transformation projects: Convincing coworkers to change the way they have always done things can be a challenge. Effective change management is key.
- Analysis and design of key user journeys: At which step cloud we use automation or provide additional service to the user?

DISASTER RECOVERY AND BACKUP PLANS

A Well-Crafted IT Disaster Recovery Plan Ensures You Are Prepared for Anything

- Having a well-crafted IT disaster recovery plan and business continuity plan management strategy that is grounded in a robust data backup and recovery solution is essential. Loss of data could mean lost emails, accounting data, patient or client files, company records, or client records. It also means potential loss of revenue.
- Organizations are under pressure from regulatory compliance, customer demands, or internal mandates to develop Business Continuity plans (BCP) and IT Disaster Recovery plans (DRP). Our Strategic Consultants can assist your organization in BCP and DR activities to help you achieve your goals.

IT PERFORMANCE ASSESSMENT

Our service quality and performance assessments will help organizations set their strategic direction, improve operational efficiency and drive world class levels of performance, while improving customer satisfaction and loyalty.

Assessment Deliverables

Our Service Quality and Performance Assessment includes a number of deliverables that will help your organization take the next step towards world class performance, including

- Comprehensive Assessment Report and Executive Presentation
- Analysis of Strengths, Weaknesses, Opportunities and Threats
- Roadmap for Implementing Recommendations

Technical Support Assessment

Service Strategies' Technical Support Assessment provides a comprehensive business review, including detailed examination of the following areas:

- Strategies and plans
- Organizational structure
- Data center Performance measurements
- Network Performance measurements
- Staff training planning
- Support systems and tools

CLOUD CONSULTING

Selecting the right cloud solution can be complex, but our cloud professionals will work with your organization, provide research and guidance, and help you make the best decision. While other cloud service providers try to fit your business within their service process,

MMS EGPT takes the time to understand your specific needs, analyze your current environment, help you navigate the different cloud options (e.g., Microsoft Azure, Amazon Web Services, Google Cloud), and provide guidance on the best approach for your organization.

COMMUNICATION AND COLLABORATION CONSULTING

Connectivity is Key for Productivity

In today's environment, your workforce needs to be connected no matter where they are and at all times. MMS EGYPT can plan a cost-effective, highly scalable communication and collaboration solution that provides users with all the benefits of a traditional telephone system, plus an extensive set of rich collaboration features.

IT STRATEGY CONSULTING PLAN

Our IT strategy covers the following areas, which our consultants can selectively tailor according to your needs:
